Online Insurance Management

Service at your Door Steps

This is to acknowledge that, this is a project submission by G-17 of section K19TG, including Roll No. 49, 51, 66.

Our project is on a company of 'online insurance management' which includes use of programming languages: **HTML & CSS** only. Please refer to the below information for details on the project.

“Insurance is like marriage. You pay, pay, pay, and you never get anything back.”

-Rajit Mehta (CEO of MAX Life Insurance)

Objective:

A website on Online Insurance Management which should include these modules; Home, Insurance Types, Policies, Claim, Plans, Dashboard, About Us.

Objective Description:

Vehicle Insurance System is an online platform that aggregates insurance plans and serves as a marketplace for car policies.

Each page was designed by keeping a separate module for that page. **The website's main page is Home.htm not the standard old index.html to increase readability throughout the project's source code.**

Sources:

- **Unsplash:** Used this site to get all the HD images, to give this site an astonishing look. *This includes all images in the images folder except the logo.jpg.*
- **LogoMaker:** Used this site to make the logo of our website #RedFuriousCar.
- **Stack Overflow:** Some code snippets for smarter use of *Visual Studio Code* which included editing some .json files to work in a live environment.

Skills Used:

- **Programming: HTML & CSS** skills as a regular thing needed for this project.
- **Adobe Classic Lightroom:** Few images in the background are photoshoped to give them a dark larkish look. *This Larkish look added an extra dark mode to the site by making the images in background shadier and gloomier.*
- **Visual Studio Code:** To work as a professional while developing this site project.

Contribution:

- **Paramjot Singh:** Adding of parallax effect and polishing off the site at last.
- **Suraj:** Adding of major CSS inside the project.
- **Kamil Sharma:** Adding of the skeleton of the site which was the most part of the HTML.

Important Points:

- All the underlined links are clickable and are left underlined by means to understand and locate through the webpage easily.
